Sanjana Salunke

9657560720 | dishasalunke780@gmail.com | LinkedIn | GitHub | Nagpur, Maharashtra

Education

St. Vincent Pallotti College of Engineering and Technology, Nagpur *June 2023 – May 2027 (Expected)*
Bachelor of Technology in Computer Science and Engineering (Data Science), Nagpur, Maharashtra

Kamla Nehru Mahavidyalaya, Nagpur *2021 – 2023*
Higher Secondary Certificate (HSC), Nagpur, Maharashtra

Relevant Coursework

Data Science & AI: Natural Language Processing, Machine Learning, Deep Learning, Artificial Intelligence

Core CS: Data Structures, Algorithms Analysis, Database Management, Software Methodology, Internet Technology

Technical Skills

Languages: Python, C, C++, SQL

Web & Frameworks: HTML5, CSS3

Data Science & ML: Scikit-Learn, Pandas, NumPy, NLTK, OpenCV, TensorFlow, PyTorch, Keras

Tools & Visualization: Git/GitHub, Power BI, Matplotlib, Seaborn, Microsoft Excel, Talend, Weka

Databases & Cloud Service: MySQL, SQLite, DynamoDB, AWS (EC2, S3)

Experience

Data Analyst Intern — Codec Technologies Pvt. Ltd. *June 2026 – July 2026*

- Built a customer churn prediction model using Logistic Regression and Random Forest, applying EDA, data cleaning, and feature engineering to identify at-risk customers and support retention strategy.
- Developed a product recommendation system using collaborative and content-based filtering techniques to personalize suggestions and improve user engagement.
- Gained hands-on experience in predictive modeling, model evaluation metrics, and data visualization using Python, Pandas, Scikit-Learn, and Power BI.

Projects

Leaf Disease Detection System (AgriVision) | **Python, Machine Learning, OpenCV** | **GitHub** *May 2025*

- Built an ML-based system that accepts live camera images or images uploaded from the system to detect plant leaf disease and estimate the percentage severity of infection.
- Trained and tested the model across 6 different plant leaf types, using image preprocessing, segmentation, and feature extraction for accurate classification.
- Auto-generates a detailed diagnosis report summarizing the detected disease and severity percentage for each analyzed leaf.

LaTeX Studio – Code Generator & Extractor | **Python, Tkinter, HTML, CSS, JavaScript** | **GitHub** *December 2025*

- Built a tool that generates structured LaTeX code for research papers and compiles it directly within a built-in editor, with no external compiler needed.
- Outputs a fully structured, formatted PDF file ready for submission, with real-time editing support for all major paper sections.

SmartDocs: Automated Profile and Doc Handler | **HTML, CSS, JavaScript, Python, Flask, MySQL, OCR** *June 2026*

- Developed a web application to securely store user documents and automatically extract key information from uploaded files.
- Generated dynamic one-page professional profiles by extracting and organizing document data using OCR and document parsing techniques.

Certifications

Fundamentals of Deep Learning (NVIDIA) — Feb 2026: Neural networks for computer vision and NLP.

GenAI Powered Data Analytics Job Simulation (TATA Forage) — June 20, 2025: Data analysis and AI-driven insights.

Certificate of Merit – Cloud Computing — July 2024–2025: Skill Development Program on Cloud Computing.

Awards & Achievements

- **Best Visualization Prize, Envision:** Recognized for impactful data storytelling and visualization clarity.
- **First Position, Code Trek (Cyberpunk 2.0):** Secured first place in a competitive coding event.
